

Component

ContactHandler

NextLevelComponent

```
graph BT; NextLevelComponent --|> Component; NextLevelComponent --|> ContactHandler;
```

The diagram illustrates a generalization relationship. A box labeled 'NextLevelComponent' is positioned at the bottom. Two arrows originate from its top edge and point upwards to the bottom edges of two boxes above it: 'Component' on the left and 'ContactHandler' on the right. This indicates that 'NextLevelComponent' is a specialized version of both 'Component' and 'ContactHandler'.
